BA-1000

"Keep your Church Family involved with the BA-1000"

One of the biggest problems facing churches today is the loss of membership through poor communications. Lets face it, many members fall away from the church because they just don't feel like they are a part. Keeping the members informed about church events and activities is essential for good participation. With today's busy schedules, it's hard to keep in touch with your church families. The BA-1000 can solve your communication problems and keep your congregation informed. In as little as two minutes the BA-1000 can be set up to call every member in your congregation. The BA-1000 will call a list of numbers and will deliver a pre-recorded message to all the numbers on the list. If the line is BUSY, or if the unit receives a NO ANSWER, the BA-1000 doesn't give up. After it has finished dialing the list it will come back and redial those numbers. Better yet, the BA-1000 will deliver that special message with the same enthusiasm for every call.

Applications:

- To keep the congregation informed of church events and activities.
- Notify members of important board or committee meetings.
- To improve the churches Outreach reach program.
- Swift notification of Prayer Line Members.
