

**Deliver your Message Faster to more people!****\$1274 00**

The BA-1000 is a high tech, single line, telemarketing system. It has many new and improved features. With the BA-1000 you can make more calls, get in touch with more people, and get better results than you would by manually dialing them. The BA-1000 is the perfect employee. It works long hours without taking any breaks, or requiring supervision. It works overtime whenever you need it to. Best of all, the BA-1000 will deliver your special message to each called party with the same enthusiasm, every time! No more telemarketing burn out to deal with. The BA-1000 is also a great manager. It knows how important it is to get in touch with each person. It keeps track of the results of each call. When it gets a BUSY, it knows that the person is home, so it will automatically call the person back in 15 minutes. If it gets a NO ANSWER, the BA-1000 will wait until it finishes its calls, then it will go back and try that person again. It will keep re-dialing the person until it gets in contact with the person if needed. The BA-1000 is also very considerate. It knows that people get irritated if you call them too early or too late. The BA-1000 will never dial before 9a.m., or after 9 p.m. If you need to contact a large number of people, you can't afford to be without this valuable communication tool.

### Features:

- Makes up to 1200 calls per day without assistance.
- Seven Day Clock Control provides accurate control over dialing periods.
- Personalized outgoing messages are easily made directly on the BA-1000 with the supplied microphone.
